## Insurance Certificate Tracking and Document Management Software Fastrack© - Windows Version System Requirements

### Single User Local Station and Demos

Operating System: Windows XP or higher

Hard Drive Space: 34 megabytes free space plus 3 MB for each 1000 certificates only or 5 MB for each 1000 document/certificates.

Processor: Intel or AMD, 300 megahertz or faster.

RAM: 1 gigabyte or greater. Insufficient RAM can result in changes not getting saved or data files mysteriously getting closed.

User Rights: the logged in user must have "Read/Write/Create" privileges to the Fastrack directory.

### Multi-user Network Version

#### **File Server:**

Operating System: Windows 2003 or higher.

Hard Drive Space: 34 megabytes free space plus 3 MB for each 1000 certificates only or 5 MB for each 1,000 documents/certificates.

**Note: Fastrack is not optimized as a client/server enterprise wide application and will be very slow on a WAN or hop greater than one. The network must be a local area network only.**

#### **Work Stations:**

Operating System: Windows XP or higher

Hard Drive: N/A

Processor: Intel or AMD, 300 megahertz or faster.

RAM: 1 gigabyte or greater. Insufficient RAM can result in changes not getting saved or data files mysteriously getting closed.

User Rights: the user login must have "Read/Write/Create" privileges to the Fastrack directory

### Monitor Screen Resolution

A screen resolution of 1024 x 768 pixels is recommended. Lower screen resolutions may result in insufficient detail being available on some screens and requiring the screen to be dragged up or down to get to various areas. The screen may appear to be chopped off at the bottom (compare your screen with the manual).
